

Komunikate®
KIP1000 operation-Portable VoiP USB Telephone

1) Installation

a) Hardware

Connect the USB cable into an available USB port in your PC or Notebook. Plug the mini-USB port into the KIP1000 - The LED will display indicating the unit is in ON.

b) Skype - Middle Ware Software

Your KIP1000 is supplied with Middle ware software for Skype.

To install Middle ware run the SETUP.EXE file on the install disk and follow the on screen instructions.

Following installation of Middle-ware, you can use the KIP1000 handset keypad to answer calls, adjust volume etc without using the PC/notebook KEYPAD or MOUSE.

2) Operation

[Log onto Skype \(www.skype.com\)](http://www.skype.com) and [download and install skype voip software on your PC or Notebook.](#)

Install Middle Ware Software for Skype.

The following operations can now be performed.

- a) '*' (shift) key minimize skype to an icon when skype is in execution; to enlarge, any other key
- b) '<' '>' key initiate skype contact list
- c) '^' 'v' key volume up, volume down
- d) 'OK' key Off Hook
- e) 'END' key ON Hook, [also used to clear a number](#)
- f) '0' '1' ... '9' Dial the called number when using Skype Out to the landline user or mobiles
- g) '#' (space) key Press each time to clear a mistyped number

IMPORTANT

To protect any possible harm to your hearing, the call will be dropped if the line is very noisy or loud during a skype call Should this occur please turn down the VOLUME by pressing the 'v' key on your handset and reinitiate the call.
